2. Handling of Certain  
Types of Defectors  
(USIB-M-212, item 7, 2 May)

In executive session, General Carter proposed that in the future the handling of defectors from an opposition foreign intelligence service should be discussed in an executive session of the USIB. After discussion, it was agreed that, whenever such a defection takes place, the USIB would in executive session:

- a. Be advised immediately if a defector was suspected of being of this type.
- b. Be informed when the defector was determined to be of this type, in order that the Board could discuss the appropriate handling of that defector.
- c. Be periodically informed as to the status of the case by the agency responsible for handling the defector.
